

Congratulations on your new implanted device

You can look forward to a renewed life thanks to this powerful piece of medical technology.

You're likely receiving this patient transmitter in the comfort of your own home and leading up to today, you've been in the care of great, professional doctors.

That's because many of us are fortunate enough to live in a country with high-quality, affordable, and accessible health care.

However, that's not the case for many people around the world.

**Heartbeat
International**

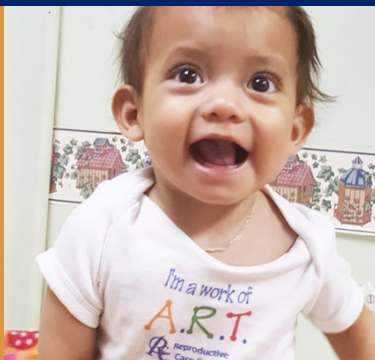

HBI provides hope and care

In many countries around the world, health care is not as advanced as it should be. Millions of men, women, and children can never see a doctor or receive any type of care for life-threatening injuries and conditions.

Since 1984, Heartbeat International Foundation, Inc., (HBI) has provided cardiovascular implantable devices and treatment to individuals in the poorest countries.

HBI has saved over **16,000 lives** in over 30 countries.

In order to continue helping individuals in need, they need our support.

Donate to HBI

Donate and get involved today. Help give others renewed life.

\$25 will sustain a patient for 1 week

\$50 will sustain a patient for 2 weeks

\$100 will sustain a patient for 1 month

\$585 saves one life by providing the device, the doctor and medical team, and follow-up treatment for the patient

Whether you donate \$5 or \$500 – **every contribution matters.**

BIOTRONIK and HBI

BIOTRONIK is committed to saving, extending, or improving one life every second with their outstanding technology. They have been a proud supporter of HBI since 2010.

Through this partnership, BIOTRONIK has donated over 9,500 devices, leads, and programmers. Over 90% of HBI implanted devices have been donated by BIOTRONIK.

Help BIOTRONIK further their mission and donate to HBI today.

Every donation helps to save a life.

HBI saves lives across the globe

Thanks to the HBI Pacemaker Program in Honduras and the donated device from BIOTRONIK, **Baby Keila** received a lifesaving pacemaker as a one-month-old.

Luz Marie was 27 when she suffered from complete heart block. She lay scared and in critical condition, knowing she couldn't afford the pacemaker she needed. With the help of BIOTRONIK and HBI she received a pacemaker and is now living a healthy life.

Arturo's heart problems began when he was three years old. Unable to afford a surgery, his parents felt scared and helpless. That changed when they met Dr. Ricardo Meneses and Arturo was rushed to a hospital 100 miles away from his home in Mexico and received a pacemaker implant.

Help HBI save cardiac patients

Make a difference
across the globe

There are many ways to help:

- Use the attached envelope and donate today
- Donate on the HBI website and learn more about how you can get involved:
